Exploring Our Energy Future

District

ECOS has urged the Trump Administration to continue a robust national dialogue around energy, as ECOS members play a leading role in these conversations in their home states and regions. During the Obama Administration, energy conversation was dominated in large part by the Clean Power Plan, the role of carbon, the Paris negotiations, renewables, and demand-side reduction. How is the energy conversation changing in the new Administration? What considerations remain front and center, and what topics are coming to the forefront? This discussion will spotlight perspectives on the direction of the energy and environment conversation in 2017.

- ❖ Martha Rudolph, ECOS Past President and Director of Environmental Programs, Colorado Department of Public Health & Environment (moderator)
