

Report Card

We develop ecological assets by restoring ecosystem functions and resilience. Over the years, our projects have improved water quality, improved threatened and endangered species' habitat, sequestered thousands of pounds of carbon, and protected the land in perpetuity. Here's a quick look at a few ways we have had a positive impact.

125,931

Linear feet (23.85 miles) of streams created, restored, and enhanced

1,489.68

Acres of wetlands created, restored, and enhanced

31,275,743

Pounds per year of suspended solids reduced

9,558

Pounds per year of phosphorous reduced

30,105

Pounds per year of nitrogen reduced

29

Years in business
