

Transforming infrastructure across Minnesota

Protecting the environment and human health

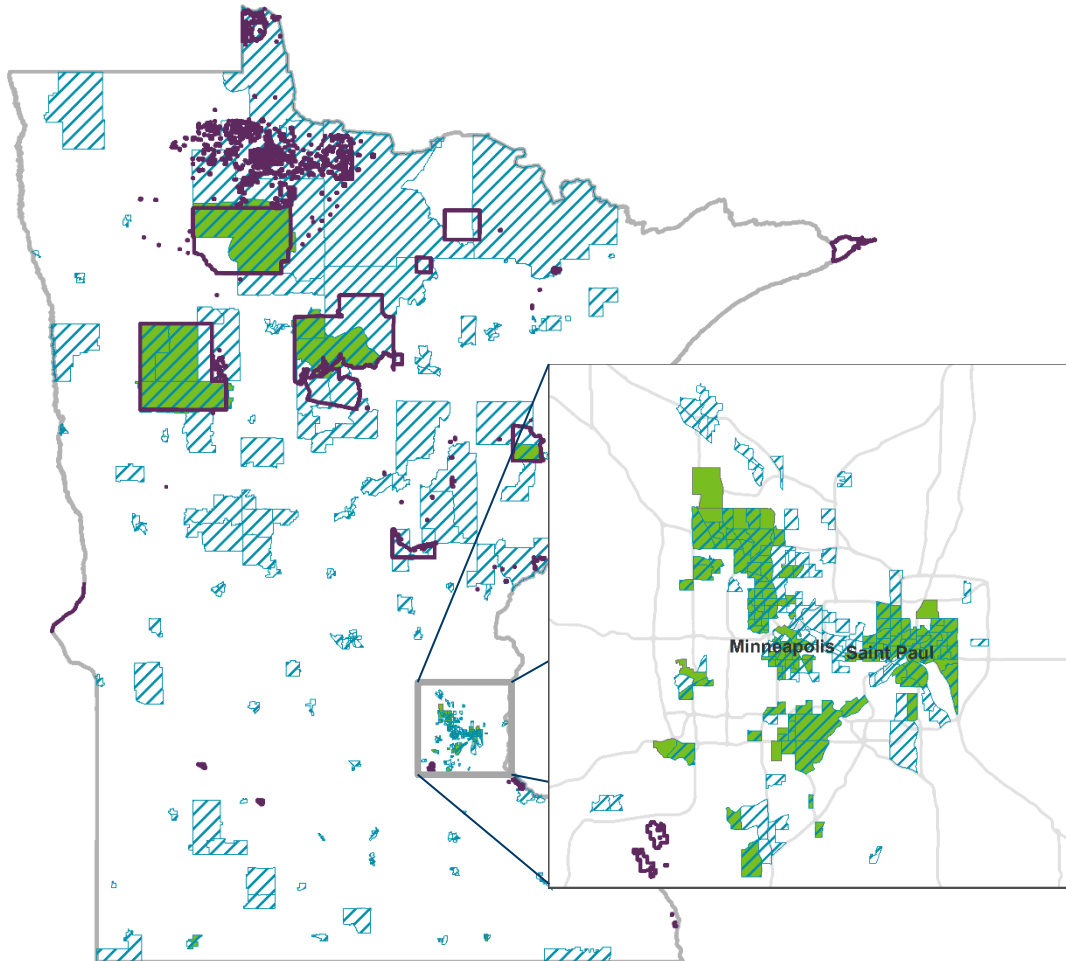

- MPCA protects Minnesotans' air, land, water, and climate
- Regulatory and support roles
- Collaborates with businesses, governments, organizations, tribal nations

Federal infrastructure funding

- \$8 billion to Minnesota
- Funding administered through existing and new state programs
- State role to optimize and innovate to maximize impact of funds
- Complement existing funding sources

Environmental justice

- Priority of the agency
- Weave environmental justice into funding evaluation
- Ensure access to funding

-
-  40% or more of residents have household income below 185% of federal poverty level
 -  50% or more people of color
 -  Tribal areas

Planning for climate challenges

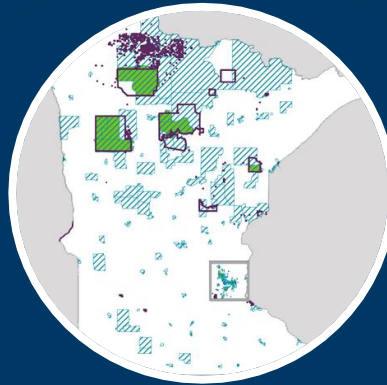

- Climate Action Framework for climate mitigation and adaptation efforts
- Collaborative, data-driven approach
- Resilience Planning Grants will support stormwater projects
