IIJA OVERSIGHT

# EPA OIG IIJA OVERSIGHT

The OIG will conduct its oversight in three phases over multiple years. Phase one will include talking with EPA officials and staff about lessons learned from past experiences, conducting fraud awareness briefings, coordinating with community partners, data mining, and other activities.

During phases two and three, we will continue to implement audits and investigations. Areas of focus will include the EPA's geographic programs, water infrastructure projects administered through states, and the Clean School Bus Program. We also will do capacity audits to evaluate the EPA's and grantees' ability to manage and use infrastructure funds. These formally assess an organization's ability to carry out its stated mission and objectives.
