OIL AND GAS CLIMATE INITIATIVE

Commit to reducing the methane and  
CO2 intensity of our operations

**THE  
ENVIRONMENTAL  
PARTNERSHIP**

Flyover Studies ongoing since 2020  
Replace high bleed pneumatics by 2023

## Oil & Gas Methane Partnership 2.0

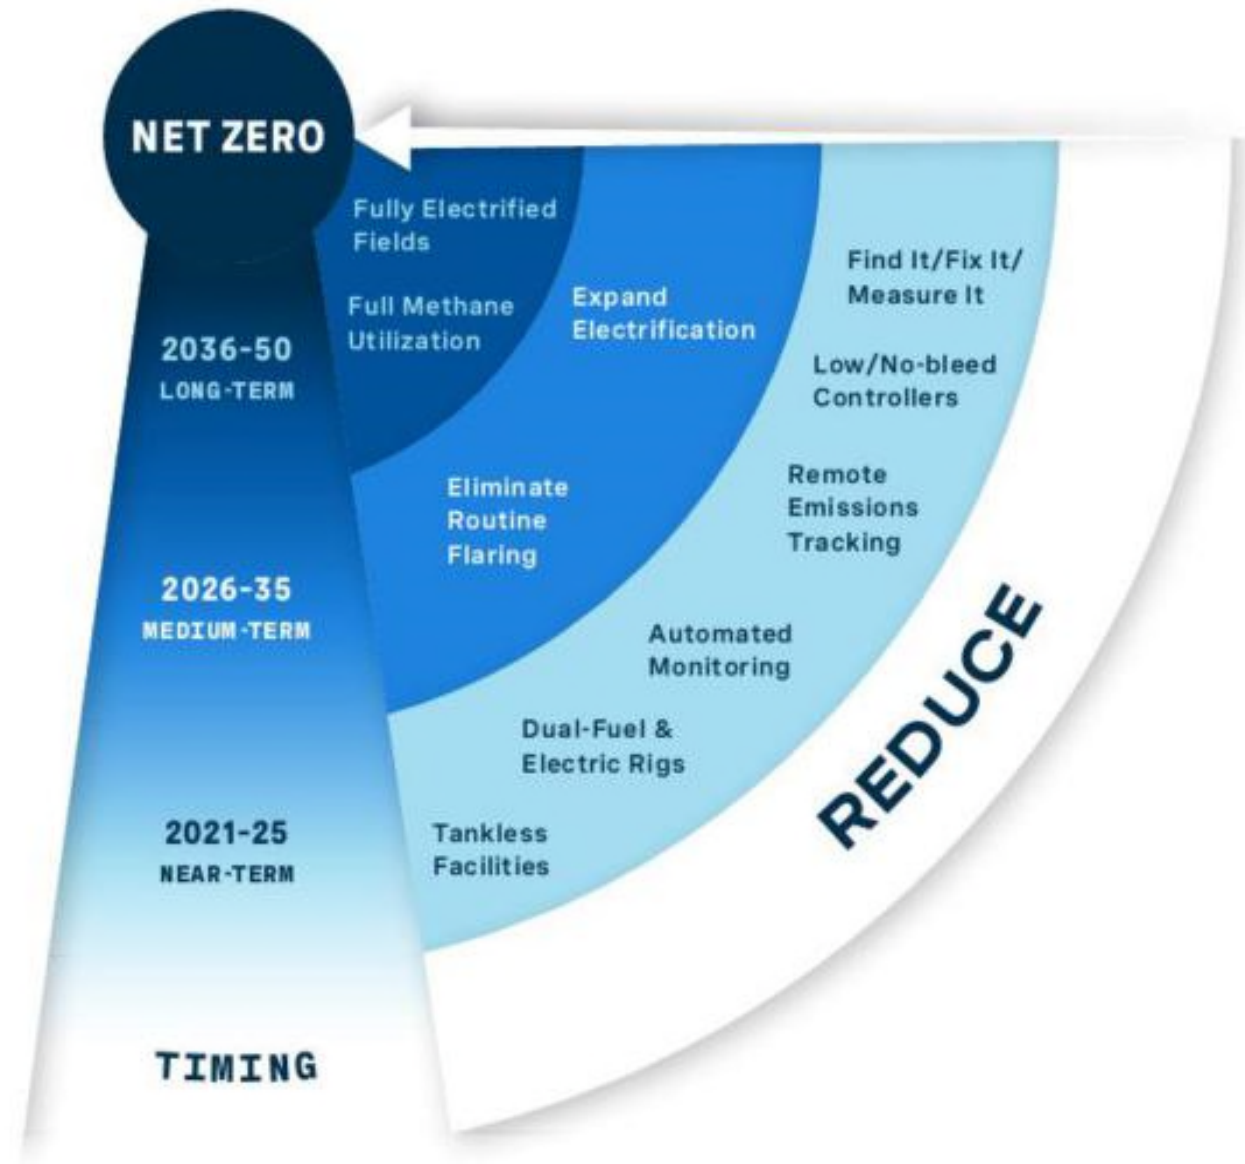

Comprehensive, measurement-based  
reporting framework that improves the  
accuracy and transparency of methane  
emissions reporting

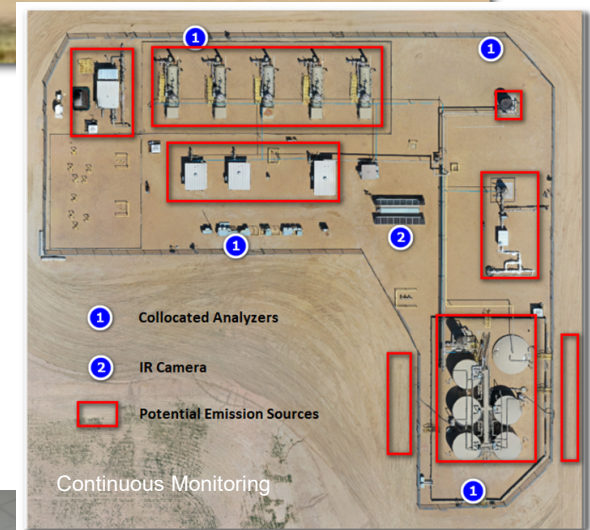

# NEW MEXICO OIL & GAS SECTOR – OZONE PRECURSOR POLLUTANTS

“The rules include key provisions given unanimous EIB approval such as comprehensive and frequent leak inspections at all wells and compressor stations as well as ensuring wells near homes and schools receive the most frequent inspections. These improvements have the support of a broad and diverse group of stakeholders including environmental, community and public health groups, NMED, the National Park Service and Oxy, the state’s second largest oil producer.” ~EDF
