

Mitigation Credits = Permit Efficiencies

- Credits cut permitting times in half and save limited staff resources (data from Corps' [IWR 2015 Retrospective](#))

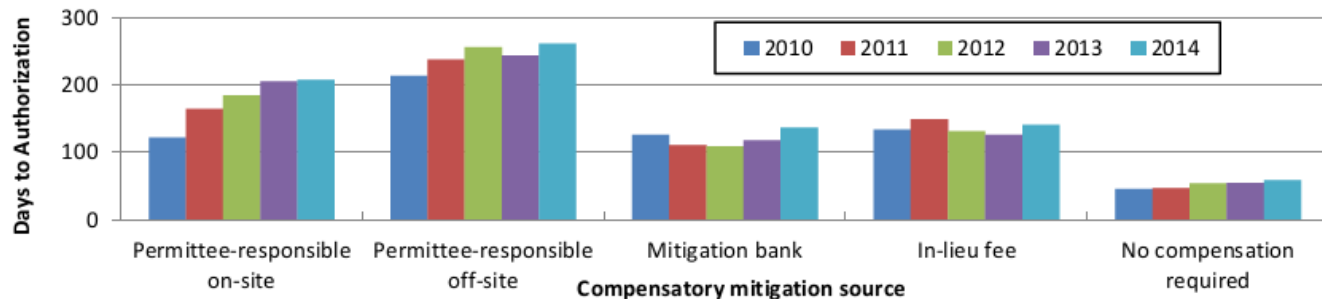

Figure 4. Average processing times for permit authorizations, by compensatory mitigation source, for 2010 to 2014.

- Analysis of ORM data from 2016-2022 confirms that bank credits continue to offer a 50% faster permitting time than off-site PRM

Time to permit a wetland restoration bank – ~~1,099~~ 1,149 days (+51 days)

225 days regulator processing
(required in 2008 Rule)

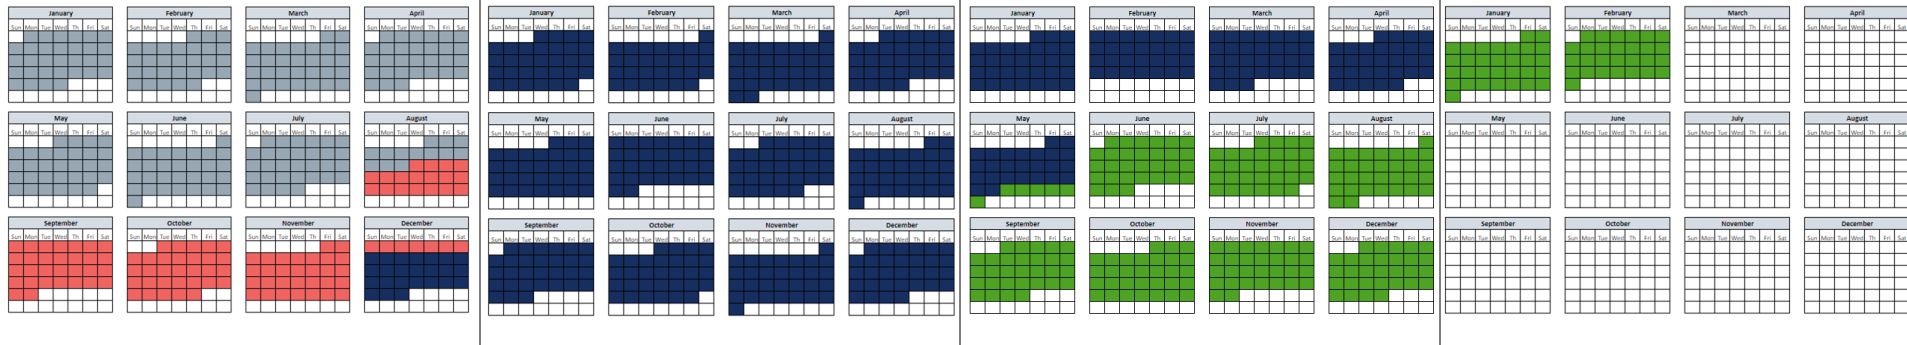

+536 days restoration
company processing

Year 1

Year 2

Year 3

Year 4

+111 additional days of
regulator processing

+277 days shared/joint
processing
